We have reviewed a copy of the Notice of Intention to Commence Small Mining Operations. We received a copy of the notices from the Bureau of Land Management on January 2, 1997.

This project is for mining Huates shale normally use as a soil conditioner.

It does not appear that the operation, as described, will have any water quality impacts. At this time, no permit is required from this office for the stated activities. However, we would like to be advised if the activities generate wastewater, which would be discharged to the ground or surface waters of the State.
